Point Of Work Risk Assessment HS2 2a (C861)

Have the required biosecurity measures been carried out?	Yes
Are you and your team fit for work?	Yes
Will any monitoring equipment be left on site? if yes give details:	No

Part 2 - Think

Select if any of the below has been identified on site and has not been controlled on your Pre Site Safety Briefing:	
List of Potential Hazards (choose if on the LP)	Slips/Trips & Falls
Use this box to record a hazard that may not be on the list or use to record a site observation:	Due to poor ground conditions it was decided that the approach to survey would be changed, we would target the features identified in the mag survey. this resulted in a later start and did not manage to collect data. but does mean the amount of survey area will be reduced hopefully making the survey easier.
Take photos (if safe to do so) of hazard/observation:	
If you have selected a hazard above please record how you will mitigate the hazard during survey / if the hazard cannot be controlled stop works and call SAT	

Part 3 - Act

Please complete below if an accident, incident, observation or near miss occurred on site / also use this section to record any hazards observed on the site:	
Details of accident, incident, near miss or observations:	
Potential Outcome	
Immediate action taken (control measures)	
Remaining risk - if risk is still HIGH stop and contact SAT	
Confirm if gate/access has been left as found?	Yes
Photos (if possible)	
Total Hours On Site (estimation this is not for commercial use)	6

Part 4 - Escalation Details

If an Accident or Incident occurs on site and you need to stop work - please contact one of the below:
